

Project Progress Report Assignment
888344 Digital Innovation Development for Entrepreneurs
Progress Report: 15%

Project Description: Students are required to complete an analysis and modeling of a digital product for their design project. This includes a completed project proposal, contextual inquiry, work modeling, and vision. These are presented in a progress report.

Work modeling includes flow, sequence, artefact, cultural and physical models appropriate for your project. This analysis stage models all the system information and is summarized in a 'vision'. The vision completes the first phase of your project.

Your progress report must include:

A proposal form:	Choose an appropriate project and complete the proposal form.
Contextual Inquiry:	An analysis of the interface and user's needs of the interface.
Work Modeling:	Provide the design of your interface(s) with multiple models (at least 3 diagrams)
Vision	An explanation of your goal, what is your vision of what your system / product / interfaces will be able to achieve.
Progress Report:	A report of your findings in a project

Deliverable:	one progress report
include:	proposal form contextual inquiry work modelling vision description progress report
Deadline:	Friday 9 th August (week 8)
Marks:	15%

The total project consists of the progress report (15%), final report (15%) and demonstration (10%), totaling a final amount of 40% for the project.

Submission:

Do not plagiarize. Any report containing any plagiarized text will be awarded a zero mark.

To submit your work either hand in a hard copy or send an email to Dr Séamus at drseamuslyons@gmail.com . Include your name, student id number, project name and attach the Word document.
